---

I am a software engineer with a background in accounting who creates code that is backed by a love of hands on problem solving. Now looking for my next challenge in the financial services industry where I can fully leverage my dual skillsets in software development and financial literacy to create code that is informed in both how it is written and in why.

SKILLS

- Programming Languages: HTML, CSS, Javascript, Express, CRUD, React, APIs
- Applications:Microsoft Office (Word, Excel, PowerPoint), Thomson Reuters (File Cabinet CS, Practice CS, Ultratax CS), Windows OS, and Oracle E-Business Suite

TECHNICAL PROJECTS

- Front-End Battleship Project: Using DOM-Manipulation and JS logic I was able to create a version of the battleship board game with alternating turns and cpu "ai"
- Decoupled Blog Project: Utilizing a microservices architecture I linked a backend blog api to a front-end blog interface to create a functioning blog service where users can create, edit, and delete blogs. As an additional feature, users are able to add images to their posts
- Full Stack Transformation Project: Using my knowledge of the mern stack I transformed a basic item checkout site into a mock website selling protected jpegs (right click and save as proof) until payment is made

EXPERIENCE

General Assembly   Remote
Software Engineering Fellow   (March 2023 - September 2023)

- Successfully completed 500+ hours of structured instructor led intensive coursework in front-end technologies, back-end technologies, and full-stack methodology.
- Developed four keystone projects as follows:
  - Github link

Altice USA   New York, NY
Staff Accountant - Capital Accounting   (October 2021 - Present)

- Reviewed activity to the general ledger to ensure compliance with company capitalization policy and US GAAP
- Prepares and uploads journal entries to the General Ledger as part of the monthly close process
- Conducts balance sheet account analysis and reconciliations to ensure that the trial balance and general ledger are in balance at the end of each close
- Reviews and uploads monthly asset activity to the fixed assets system while ensuring said assets are capitalizable, categorized correctly for deprecation, and are assigned an accurate date in service for said depreciation

Deloitte & Touche, LLP   New York, NY
Audit Associate - Financial Services   (October 2019 – June 2020)
Audit Intern   (January 2018 – March 2018)

- Staffed on year-end external audit engagements for publicly traded clients within the financial services industry
- Vigorously made improvements over testing in assigned control areas to resolve comments left by the PCAOB
- Designed, selected samples, performed, and documented both control and substantive testing in assigned control areas to test GAAP compliance
- Communicated regularly with various members of client management to obtain

better understanding of controls and processes as well as obtaining the needed support to carry out testing
- Performed the delivery of confirmations to verify client account balances with various financial institutions and maintained a log detailing their status and response.

Miller & Company, LLP   New York, NY
Intern   (March 2016 – December 2017, March 2018 – September 2019)
- Provided basic to moderate onsite IT solutions (software and hardware based) and coordinated with external IT function as needed to ensure daily operations of the company
- Performed bookkeeping for clients via QuickBooks and reconciled to bank statements

Skadden, Arps, Slate, Meagher & Flom and Associates LLP   New York, NY
Managing Law Clerks Intern   (June - August 2014)
- Monitored State Court dockets for updates to rulings made by State Courts in legal cases
- Made note of said docket updates in office records to maintain accountability for work done
- Notified relevant attorneys of docket updates concerning rulings made by state courts

EDUCATION

General Assembly   Remote
Software Engineering Fellow   (March 2023 - September 2023)
St. John's University, Tobin School of Business
BS/MS of Science in Accounting May 2019
